Initial enrollment projection for 2008: In 2007 MINED had a goal of a 2-3% increase in the initial enrollment compare to 2006 initial enrollment. MINED took all necessary measures. The new Minister declared public education free of all fees, changed corrupted directors and delegates, and gave tents to schools that did not have enough classrooms to keep the children in school. In the Municipality where CHES works, the results are that secondary school stayed stagnant, in preschool they have been close to diminish enrollment and at primary level enrollment diminished. The Villa El Carmen Delegation of MINED does not think that the goal to increase enrollment in 2008 can be higher than 3%.
